Do you do development work for Trilinos?

If so, the Interoperable Design of Extreme-scale Application Software (IDEAS) team invites you to participate in an *anonymous*, *20-minute survey*.

The questions ask about the work you do, how you coordinate and collaborate with others, and any obstacles you may face.

Feel free to take a copy, or check your email for a digital version!

If you have any questions or concerns, please contact Reed Milewicz (1426), the PI for this survey. You are welcome to reach out to him by email (rmilewi@sandia.gov), phone (505-845-0278), or in person (CSRI, room 253).
